

## IoT Gateways

---

Wherever your network takes you, look to Elma IoT Gateway Solutions for the products you need to connect the devices that matter most. Our Gateway products are designed to bring intelligence and secure connectivity to the network edge for managed Internet of Things (IoT) endpoints. Featuring fanless, maintenance free designs and based on Intel low power CPUs, each system provides maximum reliability to boost equipment efficiency, serviceability and flexibility across the limitless application spaces impacted by the IoT explosion. Custom solutions can be provided to suit specific installation and connection requirements. Let the company that knows packaging take you to the edge with the performance you need – Elma Electronic.
